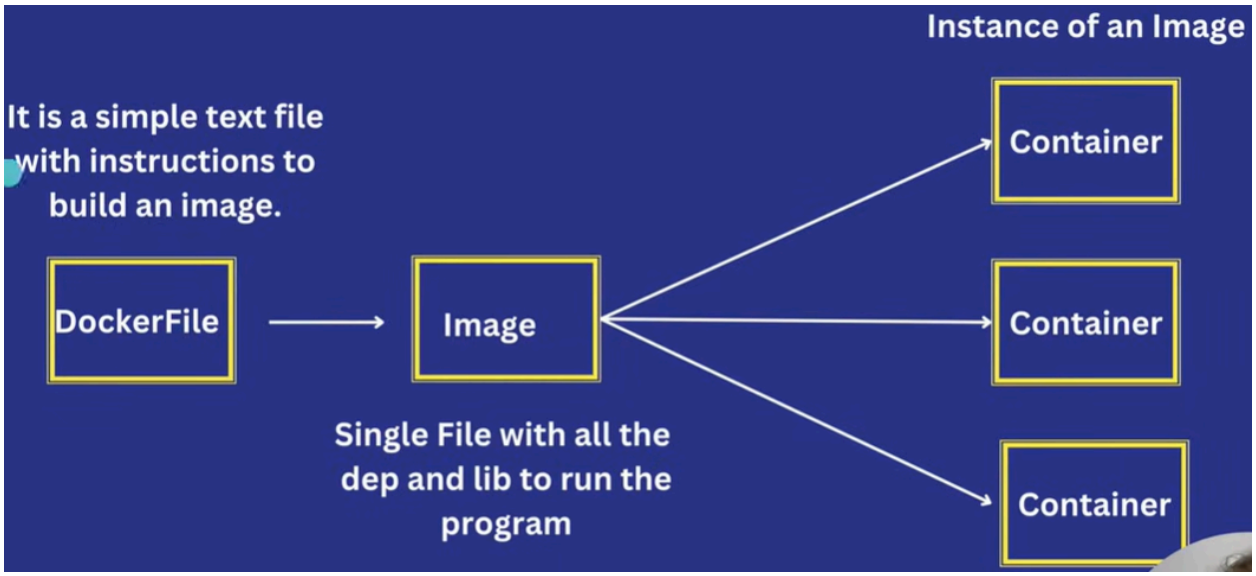
Creating Docker Image

Docker file is created, by using Dockerfile need to create a image.



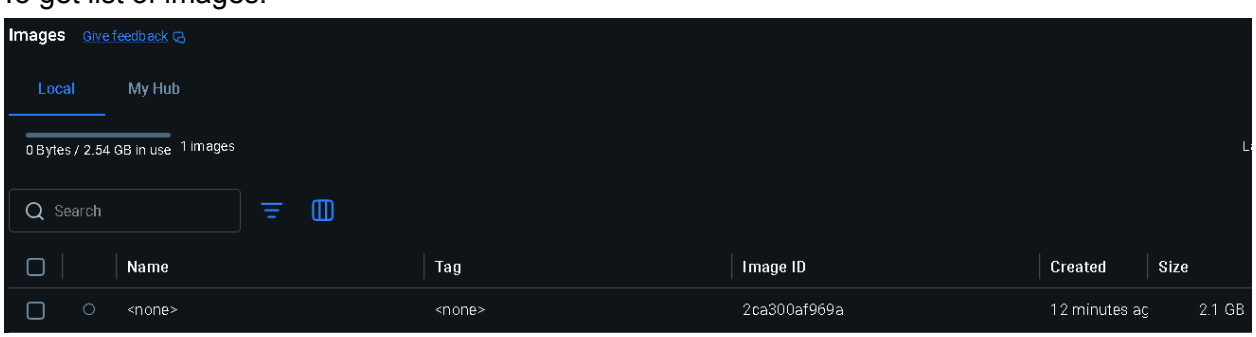
Use the command **docker build .**, where the dockerfile exists.

Error: like unable to connect to docker API

Fix: Open the Docker Desktop, and then rerun the command **docker build .**

```
PS C:\Users\kiran\OneDrive\Desktop\Web Application\testapp> docker build .
[+] Building 158.5s (10/10) FINISHED
 => [internal] load build definition from Dockerfile
 => => transferring dockerfile: 139B
 => [internal] load metadata for docker.io/library/node:20
 => [auth] library/node:pull token for registry-1.docker.io
 => [internal] load .dockerignore
 => => transferring context: 2B
 => [1/4] FROM docker.io/library/node:20@sha256:bd3086f61c05f8925ed2026bee6
```

To get list of images:



Use the command: **docker image ls**

```
PS C:\Users\kiran\OneDrive\Desktop\Web Application\testapp> docker image ls

IMAGE   ID             DISK USAGE   CONTENT SIZE   EXTRA
PS C:\Users\kiran\OneDrive\Desktop\Web Application\testapp> docker image ls -a

IMAGE         ID             DISK USAGE   CONTENT SIZE   EXTRA
<untagged>    2ca300af969a       2.11GB          491MB
```

Name	Tag	Image ID	Created	Size	Actions
<none>	<none>	2ca300af969a	16 minutes ag	2.1 GB	

Size is 2.1 GB, because we installed node_modules, etc
