

Collections in MongoDB:

Collection is the group of documents. Database is the group of Collection.

To show Collections in database:

```
school> show collections
students
```

Capped: true <- is set to provide maximum size

If capped is true: we can set up max of 100 teachers

```
school> db.createCollection("teachers", {capped: true, size: 10000000, max: 100}, {autoIndexId: false})
```

```
{ ok: 1 }
```

```
school> show collections
students
teachers
```

```
school> db.createCollection("courses")
```

```
{ ok: 1 }
```

```
school> show collections
courses
students
teachers
```

To Drop a collection:

```
school> show collections
courses
students
teachers
school> db.courses.drop()
true
school> show collections
students
teachers
school> 
```
