

# Manually Create Collection Variable

The screenshot shows the Postman interface with a collection named "Request Collection". The "Variables" tab is selected, showing a table with two rows: "BaseUrl" and "ID\_Book". The "ID\_Book" row is highlighted with a red box. A red arrow points from the left margin to the "Request Collection" header.

Variable	Value
BaseUrl	https://simple-books-api.click
ID_Book	ced7f54f58a37b6fc988a3dca69d3c7dee6f1827f74ce4afc361f94...

Add Script and send

The screenshot shows the Postman interface with a collection named "Request Collection". A POST request for "/orders" is selected. In the "Post-response" tab, a script is added to set a collection variable:

```
1 pm.test("Status code is 201", function () {  
2 | pm.response.to.have.status(201);  
3 });  
4  
5 let res = pm.response.json();  
6 pm.collectionVariables.set("ID_Book", res.orderId);
```

A red box highlights the script code, and a red arrow points from the right margin to the "Send" button.

Below the request, the response body is shown as JSON:

```
{ } JSON ▾  
1 {  
2 | "created": true,  
3 | "orderId": "4MGuC0mNL4w0duX2XAv0J"  
4 }
```

HTTP Request Collection / POST Submit Order

**POST** {{BaseUrl}}/orders

Docs Params Authorization Headers (10)

Pre-request

```

1 pm.test("Status code is
2 | pm.response.to.have.
3 | });
4
5 let res = pm.response.json();
6 pm.collectionVariables.set("orderID", res.id);
    
```

Post-response

Body JSON Preview Visualize

```

1 {
2   "created": true,
3   "orderId": "tuAOTKBWsIAwldWh9e_aQ"
4 }
    
```

Let's Check is it saved in collection Variable

Search collections Request Collection

Overview Authorization Scripts Variables Runs

Variable	Value
BaseUrl	https://simple-books-api.click
accessToken	ced7f54f58a37b6fc988a3dca69d3c7dee6f1827f74ce4afc361f94...
ID_Book	tuAOTKBWsIAwldWh9e_aQ

Now let's Use this variable in update, delete, etc

Search collections

Request Collection

- GET GET Status
- GET GET List of Books
- GET GET List of Books by Query
- GET GET Book by ID
- POST POST Register API Client
- POST POST Submit Order
- GET GET Order
- PATCH PATCH Update Order
- DEL DELETE Order

HTTP Request Collection / GET Order

GET {{BaseUrl}}/orders/:orderId
